The SOC has a math problem.

Command Zero

Alerts go up. Headcount doesn't. Investigations get harder. Complex cases take days. Attackers move in minutes.

Command Zero is the Autonomous & AI-Assisted SOC platform built for real investigations.

- Close cases in minutes, not days
- Scale your SOC without adding headcount
- 90% fewer tier-1 escalations
- 40%+ efficiency gain across the team
- Live in under an hour — no migration, no playbooks

Every step auditable. Every decision explained. Cross-ecosystem coverage across endpoint, identity, cloud, and email.

Not a SOAR. Not a chatbot. A complete investigation system.

"Groundbreaking product for us. This solution really helped us close some critical gaps and gain leapfrog maturity opportunities." — CISO | Healthcare & Biotech
